

1.2 ENVIRONMENTAL and SUSTAINABILITY POLICY		
<b>Owner:</b> General Manager	<b>Issued :</b> 1 January 2017 <b>Approved by:</b> Chief Executive Officer	
<b>Page</b> 1 of 1	<b>Revision:</b> 1 <b>Date</b> 20 February 2017	

**Purpose:** GO Electrical recognises its responsibility of environmental stewardship for future generations, and will use this policy as the guide to achieve continuous improvement towards excellence in environmental performance.

**Scope:** All avenues of operations and activities of GO Electrical, inclusive of all touch points in daily business.

**Policy:** We understand that our business has an important role to play in the planning and implementation of practices aimed to manage the human impact upon the environment.

From the highest level, we are committed to:-

- Understanding the environmental impact of our activities, and where appropriate change the way we operate.
- Complying with or exceeding legislation, regulations and standards.
- Actively review our objectives for currency, leading practices, reduced risk exposure and governance.
- Offering a sustainable product range to assist our customers to reduce product lifecycle waste.
- Promote an expectation of active employee training and participation in improving our performance, processes and practices to prevent environmental harm.
- Become more reliant on renewable energy, protect biodiversity, reuse and recycle nutrients and minimise land waste.
- Mandatory annual improvement.
- Lead by example, and encourage positive environmental practices throughout our organisation and those we deal with.

GO Electrical, through the active commitment of Management and Staff, will strive to deliver these goals, and demonstrate world class environmental governance to our customers, suppliers, and communities in the geographic areas we operate in.
